

JULY 2018 | N°02

Our new website online

The team at the AEL/LEA laboratory is pleased to announce the launch of our new website, showcasing our technical knowledge and expertise.

The new site provides information on the comprehensive range of services and expertise we offer: from our analytical capabilities to our most innovative techniques and products. AEL/LEA is eager to share its concern for environmental issues with you; please feel free to read and download our publications on the subject. An entire page is dedicated to our THOË® technology, an autonomous device developed by our research team. This innovative instrument enables optimization and cost reduction of environmental monitoring.

We do hope you will enjoy our new website. Do not hesitate to contact us for any questions, comments or recommendation at MORE... Good reading!
